Projects

Quickstagram

[website](#) | [repo](#)

Picture sharing app inspired by Instagram | React JS, Redux, Rails, HTML, CSS

- Modeled database with complex associations and numerous API endpoints allowing for commenting, searching, posting, liking, following, and tagging
- Implemented infinite scrolling in the post feed to ensure quick page loads
- Created modular React components for commenting, liking, and posting and reused them for the feed, profile pages, and hashtag search results

Stepper

[website](#) | [repo](#)

Music synthesizer and step sequencer | JavaScript, ToneJS, HTML, CSS

- Designed a web based musical instrument primarily powered by mouse events

betterDom

[website](#) | [repo](#)

JQuery-inspired DOM manipulation library and to-do list demo application

- Recreated key jQuery features to allow for powerful DOM manipulation abilities such as setting event listeners, AJAX style HTTP requests, adding and deleting Dom elements and attributes
- Built a to-do list application using betterDom demoing the library's key features

Skills: Ruby, RoR, RSpec, JavaScript, jQuery, React, Redux, SQL, Git, HTML5, CSS3, ObjC

Education

App Academy

New York City, NY • October 2016 - January 2017

1000-hour Full-stack web development course • acceptance rate < 5%
