Projects

Quickstagram <u>website</u> | <u>repo</u>

Picture sharing app inspired by instagram | React JS, Rails, HTML, CSS

- Modeled a database with complex associations and numerous API endpoints allowing for seamless commenting, searching, posting, liking, following, and tagging
- Implemented infinite scrolling in the post feed to ensure quick page loads
- Carefully created modular React components for commenting, liking, and posting and reused them for the feed, profile pages, and hash tag search results

Stepper <u>website repo</u>

Music synthesizer and step sequencer | JavaScript, ToneJS, HTML, CSS

• Designed a web based musical instrument primarily powered by mouse events

betterDom

repo

JQuery-inspired DOM manipulation library

 Recreated key jQuery features to allow powerful DOM manipulation with event listeners, AJAX style HTTP requests, the ability to add and delete element attributes among others

Skills: Ruby, Rails, RSpec, JavaScript, jQuery, React, Redux, SQL, Git, HTML5, CSS3, ObjC
